Art Unit: 3634

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 1, and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walder in view of Kloeppinger.

It would have been well within the purview of one with ordinary skill in this art to make the rack of Walker, Fig. 2, L-shaped so that it could mount on a wall, especially in view of the teachings of Kloeppinger. Shape is generally considered to be a matter of choice and design.

3. Claims 2 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walder in view of Kloeppinger as applied to claim 1 above, and further in view of Watson.

It is old and well known to provide keyhole slots and suction cups to mount a rack on a wall, as taught by Watson. It would have been obvious to mount the rack of Walker as modified by Kloeppinger in such a manner.

Art Unit: 3634

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Walker in view of Kloeppinger as applied to claim 1 above, and further in view of Tucker.

It would have been obvious to provide non-slip feet in recessed holes on the rack of Walker, as taught by 7 of Tucker.

5. The patents to Badillo, Heuer, Berlemer, Canby, Lebowitz, Dryden, Spiersch, Pearcy, and Pitts are cited to show similar structures.
